**Program Description**

The Computer Networking Technology option offers training in telecommunications, network technologies, administration, maintenance, operating systems and network planning, and implementation. Opportunities for graduates include employment as computer consultants or in networking jobs related to health care, manufacturing, telecommunications, and other businesses. The Associate in Applied Science degree is earned upon successful completion of the Computer Network Technology curriculum.

**Admission Requirements**

Priority given to applicants with ACT composite of 17 or equivalent ACCUPLACER score. All applicants must present documents of their scores.

**Job Opportunities**

Computer Technician, Web Designer, Systems Administrator, Network Engineer, Database Architect, Network Security Manager, Chief Information Officer.
